### Work Experience

Full-Stack Software Developer

**GenXys Healthcare Systems**

July 2019 - June 2023 / Vancouver, BC

- Served as a member of a highly collaborative four-person team that leveraged the Kanban methodology to design and develop the GenXys Product Suite, employing continuous feedback and improvement processes to deliver top-notch software solutions.
- Designed and developed multiple React components that are currently in use across the company's web applications, contributing to increased efficiency and improved user experience.
- Advanced from a junior developer to an intermediate developer within two years, demonstrating strong technical proficiency, initiative, and commitment to ongoing professional development.
- Received commendation from supervisor for consistently demonstrating exceptional work ethic and producing high-quality software code.

**Technologies:** C#, JavaScript, .Net Core, ReactJS, Redux, Azure DevOps, MaterialUI, SendGrid, i18next, Entity Framework, Visual Studio

Software Developer Team Member

**Plasmatic Technologies Inc.**

April - May 2019 / Vancouver, BC

- As our industry project, we are tasked to create a react native component which would allow other developers to integrate surveys and quizzes into their own applications.

**Technologies:** JavaScript, React Native, Redux, GitHub, Bootstrap, MongoDB, AWS

IT Specialist

**Taymor Industries**

March 2017- June 2018 / Delta, BC

- Working closely with the Systems Administrator, together we managed the network infrastructure consisting of 150+ end users in Vancouver, Toronto and San Francisco.

**Technologies:** AD, Exchange, WSUS, Windows Client and Server
